

Built Pedagogy

Tower 151 Architects and Studio A

The Academic Environment

Žablaca Church

The working environment of study and research requires a synthesis with both the space you are in and the ambient environment. These two issues we consider necessary for the success of a place of learning and vocation

The Design Studio

The Living Building

Hotel Pro Forma

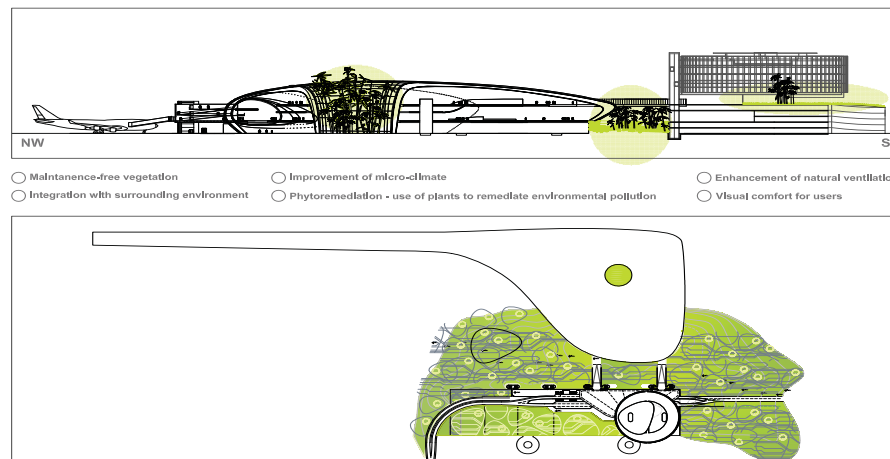

ELT

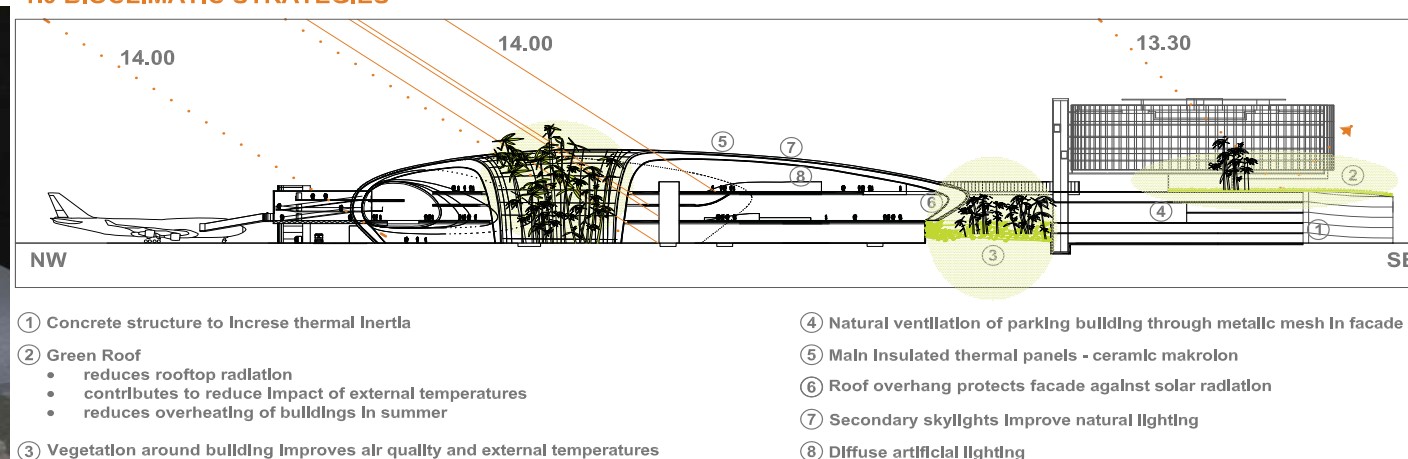

Main post Office in Zagreb

1.2 VEGETATION AND LANDSCAPING

1.0 BIOCLIMATIC STRATEGIES

Zagreb Aerodrom

Our aim is to contribute to the welfare of the environment through responsive resolution and enhancement

Capability and Process

Architects / practices

Leading Designers (Architects) – Tower 151 Architects and Studio A
Both are part of GI, a group of Architects and Project managers in Croatia – www.gin.hr
Consultants
Deck London : Leaders in Educational –Commercial byopsis programmes

Duncan Berntsen, Principle with Deck London s registered with ARB UK and RIBA

capacity to deliver the project in Melbourne,

We are quite familiar with working along side consultants and other designers and have worked in such a capacity in Denmark, Sweden Austria Germany, China and UK. We have a selection of preferred designers in Melbourne with whom we have initiated discussion and would if selected for the first stage select and engage.

nomination of preferred consultants

Environmental and Sustainable subject : Bill Holdsworth – Phoenix International (Netherlands)

preferred or intended process of collaboration with the Faculty and the University

In principle we rely very much on Client relationship and trust. As the appointed Designer we are to produce a design which will not only match but surprise the expectations of the Client – that is our job. To achieve such goals we must work with the Client as on Project Team.

We therefore expect the Client to be involved, ask questions and at times provide answers.

Part 1 Design Process - Outline Schedule

Stage 1: Due Diligence overview of existing information

Stage 2: Questions and Answers based on Due Diligence Report

Stage 3: Workshop One – sessions with Design Team and Faculty and University Team

Stage 4: Clients Brief – Issue , Review , Q/A and Finalisation

Stage 4: Concept Design – presentation and open forum

Stage 5: Workshop Two – Design update with same participants

Stage 6: Preliminary Design Presentation

The above sets out a basic schedule for Part 1 of the Design process, within, and in parallel, to other activities of liaison with Authorities and Technical collaborations are conducted.

client reference from a recently completed project

Sišak Archives – Croatia : The Director

Hypo Alpe-Adria Group - Austria – Mr Udo Dettelbacher – Department Director of Property Division.
