

Vanguard Architects has been established as a strong threshold in Thailand's architectural industry. Founded in 1994, the designs developed are suitable for people's lives that is aesthetically adaptable to improving a higher living standard. We believe in good design and effective management, with no limitations. Our diverse exposure to original concepts applied to our designs can create the most extraordinary buildings come true. Our designs are based on making a difference, pushing endless boundaries that makes a difference in design. The combination of our knowledge and expertise are organized to work side by side so that our client are assured a fast, efficient, and thorough service. Our design philosophy is "Quality" and "Economy". Quality being a priority and we don't just mean functional quality but the performance and effectiveness of our design and services makes the daily routine of our clients, a more pleasurable experience. Moreover, the firm has designed award-winning projects for several government sectors.

Vanguard Architects has been providing to clients, truly professional and comprehensive services in all fields of architecture. We operate a broad range of such related activities as the architectural design, urban planning, preparation of master plan, design in residential and commercial sectors, engineering design, construction management, interior design, and landscape architecture. We also include consultation on the feasibility and viability of a project, on prospects for its development and management. We offer our clients thorough intensive collaboration to inspire creativity from beginning until its successful completion. Clients and competitors continue to be impressed by Vanguard Architects remarkable-established base of clients among middle-sized and fortune businesses and our ability to adapt its design and services to changing marketplace.

Our team at Vanguard Architects are committed to exerting all efforts to providing effective operations and phenomenal growth of values to the company to celebrate the glorious decade of Vanguard Architects. All parties involved pledge to usher Vanguard Architects into becoming the robust organization not only with qualified and specialized employees with a solid financial balance sheets.

STUDIO

*The most subject that is concerned is the sustainable subjects. To create the energy effectiveness are added into the architectural design.*

*The advantage of the site is the surrounding which is mellow. Therefore, there is a strong wind flows throughout the building. Also, the reflective pond is help the building in terms of cooling down the heat of the concrete.*

*The skylight which is located at the middle of the building let the light pass through the roof to create a natural light throughout the building*
